

Dr. Shai Rosenberg studied medicine in the Technion Excellence Program and earned his Ph.D. in statistical genetics. He specialized in clinical Neurology and Neuro-Oncology in Hadassah Medical Center. Dr. Rosenberg is deeply interested in cancer genomics and in the application of his knowledge in computational biology to research in the field of brain tumors genomics. Dr. Rosenberg recently completed post-doctoral fellowship in the laboratory for experimental Neuro-Oncology, Salpêtrière Hospital, Paris. Since his return to Hadassah – Dr. Rosenberg combines taking care of brain tumor patients, running the laboratory for cancer computational biology and conducting research in this field.
