

Dr. Michael C. Irizarry

Dr. Michael C. Irizarry is Vice-President of Early Phase Neurosciences at Eli Lilly, responsible for the overall strategy and clinical development of the Phase 1 and 2 neurosciences portfolio. He earned undergraduate and medical degrees from Georgetown University and an MPH from the Harvard School of Public Health. He completed neurology residency and Memory Disorders Fellowship at Massachusetts General Hospital, and continued as Harvard Medical School faculty in the Massachusetts Alzheimer's Disease Research Center. His research encompassed molecular mechanisms, clinical-pathological correlations, animal models, biomarkers, and epidemiology of neurodegenerative diseases, especially Alzheimer's disease. Prior to joining Eli Lilly in 2013, Dr. Irizarry held a series of leadership positions at GlaxoSmithKline, including acting Vice President for Worldwide Epidemiology.
