

Professor Elizabeth Croydon
Senior Principal Scientist
Senior Clinical Director, Oncology
European Clinical Development

Liz is a pharmaceutical physician currently working as Senior Clinical Director at the MSD European Clinical Development unit for oncology, supporting melanoma, hepatocellular carcinoma and lung cancer late phase development. She has previously worked in Roche where she held the position of Senior Medical Manager for Atezolizumab and Cancer Immunotherapy, and at BMS as Disease Area Specialist and Global Study Physician and Medical Monitor for the Nivolumab CHECKMATE registrational programs, playing a lead role in the development of study protocols and study management, including regulatory submissions and early access programmes.

Liz received her medical degree from University of Cardiff. In addition, she holds a Bachelor of Science degree from University Swansea, Master of Science (Oncology) degree from the Institute of Cancer Research (ICR), University of London, the Membership of the Royal College of Physicians UK (MRCP) and Membership of the Faculty of Pharmaceutical Medicine (MFPM).
