

Nicholas Pachuda, WW Vice President, Orthopedic Innovation, J&J Medical Devices

Nick is the leader and Worldwide Vice President of Orthopedic Innovation for the J&J Medical Device Group. He is responsible for making J&J the partner of choice for Orthopedic Innovators around the world. He works to find the best external sources of science, technology and talent to bring transformational and clinically translatable orthopedic solutions to patients. He has worked in all segments of Orthopedics including sports, extremities, trauma, joints, spine, digital surgery and tissue regeneration.

Nick was in clinical practice for 10 years specializing in Foot & Ankle Surgery after completing his fellowship in Orthopedic Trauma.
