

Todd J. Brinton, M.D., F.A.C.C.
Corporate Vice President,
Advanced Technology
Chief Scientific Officer

Todd J. Brinton, M.D., joined Edwards as corporate vice president, advanced technology and chief scientific officer in February 2019. Dr. Brinton has significant experience as a champion of cardiovascular innovation, as well as a strong patient focus as a practicing clinician. He has deep ties to the medical technology community as a co-founder, board member and advisor to a number of start-up companies. Dr. Brinton began his career as an engineer in the medical technology industry, ultimately becoming a director of clinical research and development, prior to enrolling in medical school. Before joining Edwards, he was clinical professor of medicine (cardiology) and adjunct professor of bioengineering at the Stanford University School of Medicine. He has been an attending interventional cardiologist at both the Stanford University Medical Center and the Palo Alto VA Medical Center. He has served as the fellowship director at the Stanford Byers Center for Biodesign since 2006 where he has worked with numerous teams on the development of new technologies. In addition, he serves as the co-director for both the graduate and executive education programs at the center. Dr. Brinton received his bachelor's degree from the University of California, San Diego in biomedical engineering. He earned his medical degree from the Chicago Medical School, and completed his internship, residency, and fellowships in both cardiology and interventional cardiology at Stanford.
