

Trevor Martin, PhD
CEO and Co-Founder
Mammoth Biosciences

Dr. Trevor Martin is leading Mammoth Biosciences on a mission to democratize access to CRISPR. The Mammoth team, including fellow co-founder and CRISPR co-inventor Jennifer Doudna, has built the world's next generation CRISPR platform and company's first breakthrough application is the world's first CRISPR-based diagnostics platform capable of detecting any RNA or DNA biomarker. Mammoth has raised \$23M from lead investor Mayfield and many other investors including NFX, 8VC, Tim Cook, Brook Byers, Bob Nelsen, and Jeff Huber. His work has been featured in outlets like FiveThirtyEight and The Atlantic, and he has been the Featured Honoree on Forbes' 30 Under 30 list in 2018. He holds a PhD from Stanford University and an AB from Princeton.
