

Shahar Belkin

CTO of FST Biometrics.

Shahar has nearly two decades of experience developing new technologies, algorithms, security and remote video products including several global patents.

Shahar was founder of OzVision, a leading provider of remote video services solutions. In 1995, Shahar developed one of the first PC-based digital video recorders (DVR), and in 1997 he implemented live video over RF radio, based on a revolutionary compression algorithm.
