

Sudipto Srivastava

Sudipto Srivastava is a Senior Director for the eHealth team at Mount Sinai Health System. In this role Sudipto leads efforts to seek and build transformative and cutting edge healthcare apps, devices and mobile & TeleHealth solutions and find use cases within the Health System.

Sudipto partners with health system leadership, clinicians, academics, researchers, as well as the tech transfer and investment counterparts to assist with the identification and enablement of the appropriate digital health solutions for Mount Sinai. The eHealth team within IT also develops apps and does device integration for clinical and operational use cases.

Prior to joining Mount Sinai, Sudipto served as the VP of a New York City based public private partnership (The New York eHealth Collaborative) overseeing the development of the New York State-wide health information exchange. He also spent a significant portion of his career at management consulting companies (KPMG and CGI) in the health and human services domain.
