Tony Estrella
Head of Health Innovation and Managing Partner at
LumenLab MetLife Innovation Centre
MetLife Asia, Ltd.

Tony Estrella joined MetLife in December 2014 as Head of Health Innovation and Managing Partner for LumenLab, MetLife's Innovation Centre based in Singapore. In his role, he leads strategy and partnership development for Health at LumenLab. Tony collaborates with VCs and the management teams of health tech firms to develop operational partnerships in support of MetLife's Asia Health strategy.

Tony joined MetLife after over a decade as a founding entrepreneur starting and operating businesses in New York and London in healthcare, digital media, and technology. Tony supported these businesses through his own capital and raising angel and VC money from Seed through Series B rounds. In addition to building his own companies, Tony has advised management teams of early-stage companies across North America, Europe, and Asia on product development, commercialization, and fundraising based on his own successful experiences. Tony was initiated into venture investing and entrepreneurship through a summer associate program at TL Ventures, a fund with over \$1 billion USD under management.

In addition to his experience in building early-stage companies, Tony has also worked at Pfizer as a product manager on the Zyrtec brand, which at the time exceeded \$1 billion USD in sales. Tony started his career at Accenture (then Andersen Consulting) in consulting as both a technical architect and business strategist.

Tony is an alumnus from the University of Pennsylvania's Wharton School of Business (MBA), London Business School, and the University of Pennsylvania's School of Engineering and Applied Science (Electrical Engineering).

Tony is married with one daughter and lives in Singapore.
