Reshaping heart failure

**Boaz Manash, MSc, MBA – CEO of Cardiac Success**

Boaz Manash holds a B.Sc. in Mechanical Engineering, an M.Sc. in Biomedical Engineering, and an MBA specializing in Healthcare Innovations. As the CEO of Cardiac Success, he brings extensive experience as an R&D leader, with over 35 patents filed in the fields of interventional cardiology and gastroenterology. His innovations have attracted the attention of industry giants, leading to acquisitions by companies such as Medtronic and Boston Scientific. Boaz is recognized as an expert in transcatheter structural heart devices. In his previous role at Edwards Lifesciences, he led the transcatheter mitral valve program, the Sapien M3, demonstrating his profound impact on the field of cardiovascular medical devices.
