

Dr. David Meerkin is an interventional cardiologist and a pioneer of interventions in structural and congenital heart disease.

Dr. Meerkin trained in Medicine in Melbourne, Australia, specialized in Internal Medicine and Cardiology at the Shaare Zedek Medical Center in Jerusalem and subsequently in Interventional Cardiology at the Montreal Heart Institute in Canada.

Dr. Meerkin developed a leading center for structural and congenital interventions in Jerusalem and is a regular speaker at international conventions (e.g. ICI, TCT, PCR). He has been extensively involved in device development for nearly two decades consulting for many Israeli and international companies.
