Ms. Diane Abensur is a medtech entrepreneur and serves as the CEO and co-founder of Nanosynex, a start-up developing a disruptive solution for diagnosing antimicrobial resistance or susceptibility of bacteria to antibiotics. With a fervent entrepreneurial spirit and roots in both France and Israel, she created the company in 2018 after completing her MBA at the Technion Institute of Technology (Israel), during which she scouted for exciting technology transfer opportunities. Since its inception, Nanosynex received selective grants and awards from global entrepreneurship medtech programs and in particular, Diane was featured in the 2020 Forbes 30 under 30 list among outstanding young innovators. She loves sharing best practices with other entrepreneurs and serves as an advisor and mentor in bootcamps and accelerator programs. She previously worked as a consultant and M&A analyst on healthcare deals. She also holds a M.Sc. in Business Management and Consulting from EDHEC (France).
