

ABSTRACT TEMPLATE: CHECKLIST AND INSTRUCTIONS

Company name - Kemtai * Website - www.kemtai.com *

CEO name - Mor Amitai (Mike Telem)

CATEGORY: Health IT/Digital *

SESSIONS

- War-Time Innovation, Peace-Time Solutions; Harnessing Crisis-Driven Breakthroughs for the Future of Medicine

- Executive Summary / Investment Rational

Kemtai is the world's first digital physical therapist, leveraging next-generation computer vision to deliver guided exercises with real-time feedback and digital assessments. It reduces the need for in-person physical therapy, boosts patient adherence to 70%, improves outcomes, and lowers care costs by over 30% for payers and providers.

- Core Technology

Kemtai uses proprietary computer vision AI that has been scientifically proven to be as accurate as a motion lab and can run on any device with a camera without requiring any sensors or wearables. Kemtai identifies 111 body points and supports more than 2000 exercises and variations with real-time feedback, corrective guidance and performance and adherence tracking.

- Product Profile/Pipeline

Kemtai has customers in the US, EU, Australia and India. These are either digital health providers, rehab center and hospitals or medical device companies. Kemtai is FDA listed and CE marked as a medical device and has the Israeli AMAR medical device certification.

- Business Strategy

Kemtai sells in a B2B model directly to health systems, providers and payers providing either API-based integration into existing digital systems or an end-to-end patient clinician application.

- What's Next? R&D, Preclinical / Clinicals, Organizational Plans, Financial Plans

Kemtai is focused on increasing its customer base, mainly in the US and EU, expanding into diagnostics and further scaling its solution for different use cases including not only musculoskeletal but also cardio and neurological.
