

GyneCheck – Bridging the Gap in Women's Health Through Remote Gynecological Care

GyneCheck addresses the critical gap in women's health access,

By introducing a data-driven, remote gynecological check-up solution that women can use at home, without a speculum, and without the need for in-clinic visits.

By combining self-visualization tools, swab-based diagnostics, and telemedicine integration, GyneCheck empowers women with control over their health While enabling earlier detection, personalized care, and broader reach to underserved populations.

This innovation exemplifies how technology and data can close longstanding gaps in preventive gynecologic care.
