

Dr. Pini Tsukerman is an immunologist by training and an expert in the field of immune therapies. Pini co-founded Nectin Therapeutics, built the pipeline, and led all scientific activities for the company: Establishment of the R&D department, building the IP portfolio, and supporting capital raising. As the company matured, built the development strategy, diversifying and prioritizing the pipeline to include immune-checkpoint inhibitors, CAR-T/NK drivers, and ADCs bringing all programs to IND-enabling readiness, and successfully developing the leading project (NTX1088), from idea to clinical proof-of-concept.
