

**Salit Tzaban, PhD**

*Entrepreneur | Biopharma Innovator | Translational Research Leader*

Dr. Salit Tzaban is a seasoned biopharmaceutical executive and scientist with over 17 years of experience leading research, development, and translational science in drug and device development. With deep expertise in assay development, preclinical models, and clinical operations, Salit has built a career at the intersection of science and entrepreneurship.

Salit is the Co-Founder and Chief Scientific Officer of **Endospot**, a biotech company developing a novel, local, specific sustained-release treatment for endometriosis. She is also the Co-Founder and CTO of **Colab Square**, Israel's leading shared wet-lab facility for early-stage biotech startups, where she supports a growing ecosystem of companies with scientific guidance and infrastructure.

Earlier in her career, Salit led multidisciplinary teams at **MeMed Diagnostics**, **Enzymotec**, and **Protalix Biotherapeutics**, advancing therapeutic candidates from discovery to clinical trials. Her postdoctoral training was conducted at **Harvard Medical School** and Boston Children's Hospital, following a PhD in molecular biology from the **Hebrew University of Jerusalem**.

Salit is co-inventor on several patents and has co-authored numerous peer-reviewed publications in molecular biology, immunology, and drug development. Her work reflects a commitment to translating complex science into tangible therapeutic solutions, with a focus on impact, innovation, and scientific rigor.
