

ABSTRACT TEMPLATE for Company Presentations

The maximum number of words for this abstract is 300 words.

You may delete the section instructions, leaving only the bolded bullet title.

Questions for categories: Health IT/Digital

Answers should not exceed 60 words per question

By 2030 3.8B people will not have access to primary care. In this talk, I will discuss how 60B historical encounters are utilised to allow patient triage and proactive care. In the last few years, CMOs have been struggling to identify which patients are deteriorating and how to match them to personalized care and path navigation. I will cover real-time results of cost of care reduction by optimizing care management through better AI-driven targeting, intervention matching, and patient enrollment optimizations. The solutions have been embedded through partnerships with the Blues to 40 million members in the US, showing 4x ROI savings from a single care management program.
