

*Elliot is a physician/scientist/engineer turned repeat founder/CEO, startup investor and occasional executive. At Resilience, he is responsible for all things digital including infrastructure, applications, data, software development and security. Previously, he was at Amazon's cloud computing arm (AWS) where he started and led the company's work supporting startups, scaleups and investors in highly-specialized industries (biotech, healthtech, medtech, fintech, gametech, data science, machine learning, artificial intelligence). Earlier he founded the healthcare practice of Dreamit Ventures where he led investments in 40+ seed-stage startups. Elliot was previously the founder and CEO of HxTechnologies, a pioneer in health information exchange which he sold to Health Care Service Corporation, the parent of Blue Cross Blue Shield of TX, IL, OK, NM and MT. An NIH Fellow in the Medical Scientist Training Program, Elliot received his MD and PhD in Neuroscience from the University of Pennsylvania and holds MSE and BSEE degrees in Electrical and Computer Engineering from Johns Hopkins.*
