

Yosi Weitzman, Founder, COO/CTO, GM Israeli Site

Yosi Weitzman gained his BSc and MSc degrees from Tel Aviv University and is passionate about improving healthcare. He founded Carevature Robotics (previously Carevature Medical) and managed it “from napkin to bedside” through all stages of need identification, development, regulatory approvals and initial sales.

Before founding Carevature he co-founded Vascore Medical Systems in the field of atherectomy and AdOM – Advanced Optical Methods in the field of ophthalmology. He also developed solutions in various fields like spinal implants, heart valves repair, intraocular pressure measurement and more and is the inventor of over 55 patents.

Prior to his Medical Device journey, he was involved in the development of solutions in various fields, including spectral imaging, optical microscopy and interferometry, large format printing, motion systems and other fields.
