

Dr Shiri Ron

Dr. Shiri Ron leads the neurology focus area for Medison Ventures, the venture arm of Medison Pharma, where she handles neuro-focused investment and licensing deals. Shiri's current position leverages an extensive neuro background, centered around her training at the Weizmann institute, where she graduated with a Ph.D. in Neurobiology for developing a novel method for decoding real-time neuronal activity from genetically defined brain populations. Prior to joining Medison, Shiri was the Senior Scientist at several biotech companies developing digital health solutions for Mental health disorders (Genetika+ and VizoSpecs). Shiri also served as Scientific Editor at Vikki Academy, a company focused on building bidirectional connections between academia and relevant stakeholders.
