

Adel Nada

Adel Nada is Co-founder and Chief Executive Officer of GentiBio, a US biotech aiming to leverage best-in-class engineered regulatory T cells to address autoimmune and inflammatory diseases. Prior to joining GentiBio, Adel was the Chief Medical Officer of Casebia Therapeutics where he worked on advancing engineered regulatory T cell (Tregs) therapeutics. In the past, Adel has held executive positions in various biotech and pharmaceutical companies, including Vice President at Intellia Therapeutics and Caladrius Biosciences, and various senior positions directing clinical development at Baxter and Abbott. He successfully led translational immunology programs over past 15 years for experimental and approved therapies, spanning small and large molecules and engineered immune cell products, including Tregs products. Adel received his medical degree from Alexandria University in Egypt and his master's degree in Clinical Research from the Pharmacology Dept. at Rush University in Chicago where he also held an academic position. Adel completed advanced studies in drug development at UCSF and University of Basel before becoming a Member of the Faculty of Pharmaceutical Medicine in the UK. Prior to joining the industry, Adel trained in surgery and internal medicine and practiced for 10 years in Chicago.
