

Chen Levin

Chief Executive Officer, XACT Robotics®

Chen Levin is a seasoned leader in the healthcare space with vast experience in management and operational positions. Chen is passionate about bringing to market cutting-edge innovation, and throughout her career has contributed to—and played an instrumental role in—the continuous growth of the Israeli biomed industry.

Chen has served as CEO of XACT Robotics® (XACT) since 2013, a privately held company focused on advancing the field of radiology by developing the world's first and only hands-free robotic solutions that can significantly improve targeting accuracy, efficiency, and consistency in percutaneous procedures. As CEO, Chen is driving the strategy, day-to-day operations and customer adoption of the company's revolutionary technology that is designed to improve patient and healthcare facility outcomes.

Chen started her career in policy research, helping to shape important government biomed industry support schemes. She then transitioned into corporate MedTech, serving as the CEO of Biomagnesium Systems Ltd., an early-stage medical device company, and playing a key role in the establishment of BioLineRx, Israel's first Biomed Incubator (now a TASE publicly traded company). Following these roles, Chen served established numerous ventures and collaborations as the Executive Director of BioJerusalem, an initiative of the Jerusalem Development Authority and the Prime Minister's Office of the government of Israel to foster the biomed industry in Jerusalem.

Chen holds a BA degree in International Relations and an MBA in Finance, both from the Hebrew University of Jerusalem. In addition to her position at XACT Robotics, Chen also currently serves on the **Board of Directors for CAPS Medical**.
