David Gabay

Co-Founder & CEO of Madrigal Mental Care

David is a serial entrepreneur, CEO and strategist of innovative start-up companies. He holds a bachelor's degree in industry and management specializing in biotechnology; a Master's degree in business administration specializing in finance; as well as a Bachelor's degree in musicology. David earned all his degrees with honours.

David Founded and managed R.C.K. which he grew into a unique international company that operates as a breeding cannabis for the medical market. Under his leadership, the company created uniform seed lines for the international market that have been registered as international patents, including the unique and successful *Freud-Super Ego* variety.

As part of his doctoral preparations, David spent the past decade studying the field of consciousness and its connection to the world of physics, with an emphasis on elements from quantum physics.

In addition to his accomplishments and research in the world of science and innovation, David is an active writer and musician, bringing all of these abilities to a diverse managerial skillset, characterized by leadership perceptions that are connected to the new age of consciousness.

His latest entrepreneurial accomplishment is in the field of pharmacology with the founding of Madrigal Mental Care, a company which as mentioned, operates in the PsyTech market, and who's vision you will hear in today's presentation.
