

Dr. Shlomit Chappel-Ram

Shlomit Chappel-Ram, PhD, has more than 15 years of R&D management experience in the medical device and high technology industries. She has successfully managed multidisciplinary teams from early phase concept development through the formal product development process to successful product regulatory approvals and transfers to manufacturing. She previously served as Vice President, R&D in Nano-Dimension Technologies and in management roles of progressive responsibility in Edwards Life Sciences and Medinol Ltd. Dr. Chappel-Ram joined Digma Medical in 2021 as Vice President, R&D, where she is responsible for all aspects of the development of the company's novel Endoscopic Glycemic Management catheter and serves as part of Digma's Senior Leadership Team.

Dr. Chappel-Ram holds a BSc (Summa Cum Laude) in Physical Chemistry, Ph.D. (Summa Cum Laude) specialized in Photo-electrochemistry and Materials Science, and an MBA all from Bar-Ilan University, Israel.
