

**Einat Galamidi**  
**VP Medical, Enlivex Therapeutics**

Einat Galamidi has recently joined Enlivex as VP, Medical after 20 years of experience in drug development, from basic research to advanced clinical development. Einat holds an M.D. from the Hadassa Medical School in Jerusalem, Israel, and a M.Sc in Developmental Biology. Over the last 11 years Einat worked at Gamida Cell, and for the last two years held the role of Vice President of Clinical Development, responsible for the medical leadership of a number of clinical trials. Over these years she advanced the clinical development of several cell therapies for the treatment of patients with hematologic malignancies and non-malignant hematologic diseases. Her work spanned early phase clinical research to phase 3 registration studies and preparation of the BLA filing submission.
