Dr. Avner Geva

Co-Founder and CEO

Avner Geva is a Biomedical Engineer with 10 years of experience in the life sciences. He is the founder and CEO of Vensica, a company that is developing the Vibe, a catheter that unlocks the power of therapeutic ultrasound to deliver drugs to the bladder wall. Avner has raised to Vensica more than $25M from strategic global investors, and recently led the company to sign a partnership with Merz Therapeutics. Avner also is the founder of IntraGel, a company that is developing a cancer drug. Avner holds BSc from Yale University and MSc from the Technion.
