

Tal Lutzky

Co-Founder and CEO- Pigmentum

Tal Lutzky is an Israeli entrepreneur, he is a qualified agronomist from the Robert H. Faculty of agriculture of the Hebrew University (graduated with honors), with over 15 years of experience across multiple agriculture crops, from pineapple to cannabis, project managing and R&D. Together with Amir Tiroler & Prof. Alexander Vainstein, world leader in the field of molecular genetics and metabolic engineering in plants, He founded Pigmentum, relying on a proprietary and patent-protected molecular technology platform which turns indoor or outdoor grown crops into efficient producers of high-value compounds.

Tal is an alumnus of the EIT & Facultech agri-food-tech programs.
