

Yair Benita is the CTO of AION Labs, an innovation lab committed to building 4-6 startups in the pharma AI field every year. Yair is a computational biologist who spent more than 20 years studying biology through omics and clinical data in an effort to piece together mechanisms of human disease. He led computational teams in the drug discovery field at CytoReason and Compugen. Yair also spent 8 years in Boston where he completed a postdoc at Massachusetts General Hospital, Harvard University Medical School and worked as a senior scientist for Merck Oncology (MSD). Yair holds a Ph.D. in Bioinformatics, from Universiteit Utrecht in The Netherlands and a B.Sc. in Pharmacology from The Hebrew University of Jerusalem.
