

Avi will present on behalf of Nucleai, a cutting-edge spatial biology platform company that harnesses AI pathology to revolutionize drug R&D and clinical treatment decision-making. In his presentation, Avi will discuss the tremendous potential of spatial biology to advance drug development and improve clinical outcomes.

Drawing on his extensive experience leading multidisciplinary teams, Avi will share insights from Nucleai's journey to date, including the challenges and opportunities of building a successful biotech company from the ground up. He will highlight the critical role that strategic planning and partnership building have played in Nucleai's success and the company's commitment to innovation and excellence in all aspects of R&D.

Overall, Avi's presentation will provide a unique and valuable perspective on the transformative power of spatial biology and the vital role that companies like Nucleai are playing in driving innovation and progress in the field of biotechnology.
