

Multi-technology additive manufacturing for 3D structural electronics

Dr Erwin R. Meinders

Dr Erwin Meinders, senior innovation manager at TNO, has a +15 years track record in advanced manufacturing and 2d/3D printing. Erwin holds a PhD from the Delft University of Technology, and held several innovation management positions at Philips Research, Philips Optical Storage, Holst Centre and TNO. He is currently responsible for the Additive Manufacturing programs at TNO and is building a co-creation platform, based on strategic alliances with industrial and R&D partners.
