

Dr.-Ing. Ines Schneider

Affiliations:

Bundeswehr Research Institute for Materials, Fuels and Lubricants (WIWeB)

Position:

Head of Department of Microscopy, Materialography and Failure Analysis

Short Bio:

Dr. Ines Schneider received her degree as a graduate engineer in the field of Materials Science at the Technical University Chemnitz (1993). For her scientific work in the field of dynamic testing and materials behavior of brittle materials she earned a PhD in Materials Science (2001). Since 1998 she is a scientist at WIWeB dealing with materials topics in different fields, like light weight structures, severe plastic deformation, metallic glasses and protective materials. Since 2014 she is leading a department dealing with failure analyses as well as relevant research topics in the field of materials for the German Armed Forces.
